

Model:	YARVIS	Protection Class:	S3 HRO SRC CI
Article:	RL20514	EU Regulations:	EN ISO 20345:2011 CE

DESCRIPTION

Safety shoes in soft, highly resistant, water repellent, Pull-up leather with double lace.

Work shoes with soles in PU/Vibram that ensure high grip and increase traction on uneven ground and treacherous surfaces. The sole is also oil resistant, abrasion resistant and anti-slip.

These safety shoes in protection class S3 HRO HI CI SRC come with the bottom of the shoe insulated against heat and cold and they offer greater resistance to heat by contact with the sole ($\geq 300^{\circ}\text{C}$).

100% protection of the surface of the foot is guaranteed by the Save & Flex® PLUS, completely "No Metal", anti-puncture system and stitching directly on the upper, whilst the AirToe toe cap protects the toes and tip of the foot. The PU-reinforced scuff cap increases the footwear's strength.

Comfortable work shoes with anatomical, anti-bacterial, breathable WOW insole and WingTex air tunnel inner lining for prolonged well-being throughout the day. Finally, the Infinergy® system for energy recovery: well over 55% recovered with each step.

Yarvis is perfect for use in cold and wet environments, shoes for construction sites and building sites, port areas, road works and maintenance, installations and any work outdoors on uneven ground and treacherous surfaces.

UPPER	LINING	SAFETY TOE CAP
Water repellent, Pull-up leather	WingTex breathable air tunnel	Aluminium AirToe® with breathable membrane
